Clinical skills and experience

- Extensive clinical experience as an occupational therapist working within hospital and rehabilitation settings including general hospital, stroke units, inpatient rehabilitation facilities and outpatient clinics.
- Highly knowledgeable in evaluating and treating clients with medical, neurological, rheumatological, orthopaedic and spinal conditions, including upper limb and hand conditions.
- Employs a multi-disciplinary team approach when working with allied health professionals and medical practitioners.
- Highly experienced case manager assisting clients with their rehabilitation and vocational needs.
- Disability claim management process knowledge, having been formerly employed as a disability claims consultant.
- Skilled functional capacity evaluator assessing clients' functional and work-related capabilities and their ability to perform their own or other occupations. Very experienced in evaluating clients with occupations ranging from those of a lighter physical demand, including solicitor and dentist, to those of heavier physical demand including labourer, machine operator and engineer.
- Vastly experienced in conducting workplace evaluations, job demands analysis and ergonomic assessments and advising on reasonable adjustments, equipment needs and redeployment options. Conducted evaluations within a range of work settings including a nuclear power station, veterinary practice, law firm, banks and accountancy practice.
- Experienced in developing, implementing, monitoring and graduating structured and goal orientated return to work programmes.
- Very knowledgeable in liaising and negotiating with employers in order to explore redeployment options, facilitate reasonable work place adjustments and assist employees to return to work.
- Committed to continuing professional development - full details of recent training are available on request.
- Client and solicitor feedback/testimonials are available on request.
